

ADDENDUM NO. 2

RFP #26-011 Mid-Life Transit Vehicle Overhaul

January 29, 2026

RFP #26-011 Mid-Life Transit Vehicle Overhaul issued on January 15, 2026. This Addendum is being issued to clarify the RFP documents and shall supersede and supplement all portions of previously issued RFP documents with which it conflicts.

NOTE: Regarding Section 5.8 Electrical System – any heat shrink used must be marine-grade.

NOTE: Proposers are required to submit pricing information with the new Cost Proposal Form attached. A Word version is uploaded with the solicitation documents on PVTA's website.

The PVTA hosted a non-mandatory pre-proposal conference on January 27, 2026 at 10:00 AM EST. The conference provided a summary of the RFP requirements, Scope of Work, and a brief Question and Answer session. Nothing stated verbally in the conference is binding. A recording of the conference is available upon request.

This Addendum #2 provides a response to the following inquiries received during the pre-proposal conference on January 27, 2026 at 10:00 AM EST:

INQUIRY #1: The pricing sheet shows cost of labor, cost of parts, and then overhead and profit for a total price. Typically, we don't provide our margins, can you clarify what you are looking for on that sheet?

RESPONSE: We are looking for the proposer to provide a firm-fixed price with a price breakdown per category. This is updated on the new cost sheet attached.

INQUIRY #2: Relating to the term "as required," it is challenging to provide an accurate firm-fixed price when some work is unforeseen or could result in extra work. Can you provide an extra price category on the cost sheet to cover "as required" work?

RESPONSE: Yes, the new attached cost sheet provides a "Hidden Damages" section under optional pricing. All "as required" work that results in repair and/or replace beyond the initial inspection shall be treated as Hidden Damages. All approved Hidden Damages work will be reimbursed as Time and Materials. Proposers must indicate one (1) fully loaded labor rate (labor, overhead, profit, etc.) that will be charged for all and any Hidden Damages work. Proposers shall attach a separate parts sheet to their cost sheet with expected prices to be charged to PVTA that covers all listed "as required" replacements outlined in the scope of work. The selected Contractor shall send the price of parts for any replacements required as

Hidden Damages not outlined in the scope of work to PVRTA at time of discovery. All Hidden Damages work whether anticipated or not must be approved by PVRTA. When notifying PVRTA, the selected Contractor must submit the price of any parts required and an estimated number of labor hours.

INQUIRY #3: It will likely be difficult to meet the required delivery schedule given lead time from vendors. Considering the involvement of liquidated damages, are LDs based on the proposer's schedule or the schedule PVRTA has provided?

RESPONSE: It is currently anticipated that the liquidated damages will reflect PVRTA's listed schedule. However, if proposers have lead times that render PVRTA's schedule impossible, then PVRTA will need to consider alternate schedules. Ultimately, the liquidated damages will reflect a realistic delivery date determined after reviewing proposals and potential discussions with proposers. The PVRTA may elect to send one bus at a time rather than both buses together if the ideal schedule cannot be met. The Contractor shall not charge additional costs if PVRTA elects to send buses separately.

INQUIRY #4: Can you please clarify expectations regarding warranties?

RESPONSE: The PVRTA will accept any and all posted warranties on all parts, components, and work, however, a proposer, in their proposal, shall clearly outline all warranties and their durations, and which parts, components, or work is applicable/covered by each warranty. The PVRTA would also like the option of buying extended warranties for the batteries, engine, etc. The new attached cost sheet includes a section under optional pricing for extended warranties. A Word version of the cost sheet is uploaded to PVRTA's website with the solicitation documents so proposers may add warranty options. All warranty options must include duration, applicable parts/components/work, and price.
