

ADDENDUM NO. 4

RFP #26-011 Mid-Life Transit Vehicle Overhaul

February 27, 2026

RFP #26-011 Mid-Life Transit Vehicle Overhaul issued on January 15, 2026. This Addendum is being issued to clarify the RFP documents and shall supersede and supplement all portions of previously issued RFP documents with which it conflicts.

This Addendum #4 provides a response to the following inquiries received:

INQUIRY #1: We respectfully request that the Professional Liability and Employment Practices Liability requirements be reconsidered and removed or alternatively confirmed as not applicable to this project.

RESPONSE: Yes. Both of these are removed/not applicable to this project and are not required.

INQUIRY #2: We received information from the door OEM, Vapor, that changing the limit switches to proximity switches requires new brackets, a new harness and the bus would need a new software. Will you accept new baseplate with no changes to the switch?

RESPONSE: Yes, we will accept a new baseplate with no changes to the switch.

All other requirements of the RFP shall remain in full force and effect.
