

ADDENDUM NO. 5

RFP #26-011 Mid-Life Transit Vehicle Overhaul

March 3, 2026

RFP #26-011 Mid-Life Transit Vehicle Overhaul issued on January 15, 2026. This Addendum is being issued to clarify the RFP documents and shall supersede and supplement all portions of previously issued RFP documents with which it conflicts.

NOTE: The requested Avail Bill of Materials is attached to this addendum.

This Addendum #5 provides a response to the following inquiries received:

INQUIRY #1: Exhibit A asks if our company is authorized to do business in Massachusetts. Are we required to be registered with the Secretary of the Commonwealth?

RESPONSE: You must register if you are awarded the contract. See language below:
“All corporations transacting business in the commonwealth and organized under laws of a different state or country must file a certificate of registration within 10 days after it starts to transact business in the commonwealth. A certificate of legal existence or good standing issued by an authorized officer or agency in the jurisdiction of organization shall accompany the certificate of registration.”
(M.G.L.A. c156D § 15.03 (2004); 950 CMR 113.48)

INQUIRY #2: Exhibit D contains a Buy America Certification applicable to Steel, Iron, Manufactured Products, and Construction Materials. Based on our understanding of the scope of work and the nature of the deliverables under this procurement, it appears the project may instead fall under the Federal Transit Administration’s Buy America requirements for rolling stock, which apply a domestic content percentage threshold to the cost of components rather than focusing on the manufacturing process of steel, iron, and construction materials. Can this be replaced?

RESPONSE: The Buy America rolling stock certification is attached. Proposers must certify compliance with this certification in place of the existing Buy America certification.

INQUIRY #3: Can you supply the paint scheme for the buses.

RESPONSE: Paint scheme is attached to this addendum.

INQUIRY #4: There is a certification included in the required documents titled Right-to-Know Certification. As the work being performed under this RFP does not require our employees to be present at your work site, could you please confirm whether this

certification is applicable and required to be completed for this solicitation?

RESPONSE: Proposers with out-of-state worksites are not required to follow the applicable provisions of the Right-to-Know law and are not required to sign this certification. However, considering that PVTa staff reserves the right to visit the awarded proposer's worksite at any point to review and inspect the work, we ask proposers to submit in place of this certification, a signed assurance that they will provide any PVTa staff visiting the awarded proposer's worksite with the same PPE and equivalent—to the extent applicable—safety information that they provide their own staff. This signed assurance can be in the format of each proposer's choosing.

All other requirements of the RFP shall remain in full force and effect.

Buy America Certification – Rolling Stock

If buses or other rolling stock (including train control, communication, and traction power equipment) are being procured, the appropriate certificate as set forth below shall be completed and submitted by each bidder in accordance with the requirement contained in 49 CFR 661.13(b).

Certificate of Compliance with Buy America Rolling Stock Requirements

The bidder or offeror hereby certifies that it will comply with the requirements of 49 U.S.C. § 5323(j), and the applicable regulations of 49 CFR 661.11.

Date: _____

Signature: _____

Company Name: _____

Title: _____

Certificate of Non-Compliance with Buy America Rolling Stock Requirements

The bidder or offeror hereby certifies that it cannot comply with the requirements of 49 U.S.C. § 5323(j), but may qualify for an exception to the requirement consistent with 49 U.S.C. § 5323(j)(2)(C), and the applicable regulations in 49 CFR Part 661.7.
